

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1. (currently amended) An overflow system for a bathtub which has a bottom, and adjacent side and endwalls, a drain port in the bottom, and an overflow port in one of the endwalls, comprising:

a drain pipe adapted to be in communication with said drain port and said overflow port,

said drain pipe having an inverted L-shape, including a horizontal leg extending into and through the overflow port of the bathtub, and a vertical leg extending downwardly for connection to a fluid drain system,

threads on the horizontal leg extending through the overflow port, and

a cap threadably mounted on an end of the horizontal leg extending through the overflow port,

the cap having an opening in its circular planar end, with a thin ~~flexible~~-sealing membrane secured to the cap and extending over the opening in the circular planar end.

Claim 2. (currently amended) An overflow system for a bathtub having an overflow port ~~A plumbing test system~~ comprising:
a drain pipe having a first exposed end through the overflow port having an externally threaded portion;

~~an overflow pipe having a first exposed end and second end in communication with a fluid source, wherein the first end comprises an externally threaded portion;~~
~~a cap assembly threadably mounted on the first end and wherein a portion of the cap assembly is composed of a material capable of sealing the first end when the cap is threaded onto the first end;~~
a cap assembly having a cap with an opening in a planar end, and a sealing member secured to the cap and extending over the opening in the planar end; and
the cap threadably mounted on the externally threaded portion of the first end ~~and wherein the sealing material is composed of a material capable of sealing the first end~~ such that the cap is sealed against the overflow port when the cap is threaded onto the first end.

Claim 3. (cancelled)

Claim 4. (currently amended) An overflow system ~~A temporary closure device~~ for a bathtub with an overflow port in an end wall of the bathtub, comprising:

a drain ~~an overflow pipe~~ having external threads that extend through the overflow port;
a cap having an outer face, an aperture at an open end, and a body with interior threads adapted to mate with the external threads of the drain ~~overflow pipe~~, and
a thin sealing membrane affixed to the outer face to seal the aperture of the cap.
